Subject:

Continued Crocus City Hall bombing was an FSB false flag operation

The ISIS attacks were not coincidental, but were carried out with at least the understanding of the FSB.

Therefore, it is safe to assume that there were not a single casualty.

No video footage was released showing the anger of the relatives of the dead and injured, who would normally be in Moscow.

1. It is clear that the FSB was aware that there was a mass shooting due to information from British intelligence.

1) Terrorists were walking, not running.

I was walking slowly inside the building, taking footages from behind the terrorist side.

2) The gun the terrorists possessed was the latest Russian-made AK-12

This is the second time it has been used in Ukraine, and given the Russian military's weapons shortage there, it is unlikely to be on the global market or available to terrorists.

3) If the act was carried out after receiving a reward, it cannot be called an act of terrorism by a terrorist. That's not normal, because it's a business practice.

In order to attribute the blame to Ukraine's involvement, Russia used torture to get the perpetrator to admit that he had received compensation from (Ukraine).

Russia itself is claiming that it is not terrorism. Even in the video, it is clear that the two men went out of their way to indicate the location with their hands, aim the gun at an area where no one was around, and shoot the gun with the camera in mind.

The infiltrating terrorists were not on guard at all. They look like they are acting and filming.

2. Biden and the US military have no intention of letting Russia win Ukraine.

Until 2024, the US has prohibited weapons donations from the US and NATO countries from being used in mainland Russia.

Ukraine also understands this and has not used it.

However, the US seems to have started saying that it is trying to prevent Ukraine from winning against Russia in 2024. They have commented that the destruction of military facilities and military logistics equipment in mainland Russia with Ukrainian weapons should not be done.

"Online Press Briefing with Ambassador Julianne Smith U.S. Permanent Representative to NATO" Special Briefing, April 2, 2024

MODERATOR Alex Raufoglu : (omission)

On Ukraine, as you know, Russia keeps increasing the targeting of Ukraine's energy infrastructure, and there were reports recently that the U.S. was against Ukraine hitting back inside Russia on Russian energy infrastructure.

I was wondering – just wanted to ask you directly that are there any constraints placed upon Ukraine in how Ukraine fights back or takes the fight back into Russia?

I'm asking because there's a growing sentiment that Ukraine is given enough to survive, but not enough to win.

AMBASSADOR SMITH: (omission)

In terms of actually going after targets inside Russia, that is something that the United States is not particularly supportive of.

We are focused on Ukrainians' right to defend its territory and to push Russians out of its territory, where the Ukrainians have had considerable success.

And again, our objective is to help them continue to see those victories on the battlefield.

There are some things to consider carefully here.

Russia has expanded its territory by destroying everything in Bucha and Mariupol, including civilian facilities, massacring and

torturing civilians.

Ukraine is in a civil war and will never be able to make such a retake of its own territory.

Knowing that it would never be possible to retake it with ground forces, Ambassador Smith told NATO that the US was "seeking that."

The NATO ambassador made it clear to NATO countries in Europe and Canada that President Biden is trying to impose a "ceasefire-like peace" on Ukraine.

From the beginning, Russia invaded Ukraine as a special military operation.

Considering the fact that it was not labeled as a "war," it is safe to assume that the US Biden administration made a backroom deal with the Kremlin to get Putin to invade Ukraine.

If we consider that the US is itself a "Merchant of Death" and used its spies, the head of the Nazi FSB, Bortnikov Hitler, to force Putin to invade Ukraine in order to raise the price of oil, we can understand the essence of Russia's war of aggression against Ukraine.

This is in perfect agreement with what members of the Russian negotiating delegation said: Although Ukraine and Russia had agreed to halt the invasion on the condition that "Ukraine not join NATO" after the invasion, Biden opposed it, and the invasion continued and expanded.

3. Why did you start telling Ukraine to stop its attacks on mainland Russia?

I warned Ukraine, the US, and others that they should be careful because the US's true intentions have become clear:

"The US has been telling Ukraine not to carry out escalatory attacks against mainland Russia for a long time."

However, it acquiesced in attacks carried out by Ukraine using winged AI drones on an oil export facility near St. Petersburg and on distillation towers at an oil refinery. It was not considered an escalation.

Biden acquiesced because the attack was advantageous to the US oil majors. Biden let Russia invade Ukraine and covered up the fact that the real Putin was dead. The oil majors, the real culprits who are keeping the war still going on, have come to the fore.

In time, it will become clear that US Biden is even more of a criminal in this war than Putin, and US oil majors are the masterminds behind the scenes.

The US has always aimed to "force a ceasefire with Ukraine due to escalation." They continued secret deals with Russia to make the FSB carry out false flag operations.

So were the FSB's drone attacks on civilian buildings and airfields in Moscow. If there was a video of the bullet landing, it would have been a false flag operation, and it have been obvious right away.

At times, they even used the US military to carry out false flag operations.

http://kay5.music.coocan.jp/Be_careful_with_Biden.pdf

The Biden administration's goal in 2024 was to leave Ukraine with a shortage of air defense weapons, such as Patriot missiles, and force Russia to carry out escalation bombing attacks on power facilities and civilian homes.

In response, Ukraine needed to take action to prevent Plan X from triggering a major blackout in Moscow using AI winged drones. So they probably had the Russian FSB carry out a false flag operation at Crocus City Hall.

In retaliation, they would bomb Ukraine, which lacked air defense missiles, in an attempt to cultivate public opinion in Ukraine that would allow President Zelensky to accept a "ceasefire peace."

Zelensky's dismissal of Danilov as Secretary of the National Security and Defense Council was likely at the request of Biden.

It was Zelensky's betrayal of the Ukrainian people, on the same level as when he dismissed General Zarzhny.

Ukraine could have won against Russia, but Zelensky did not want to win, instead accepting a "ceasefire-like peace" that would continue the conflict and military tensions without returning to peace.

http://kay5.music.coocan.jp/Semi-automatic_ground_combat_AI_robot_system.pdf

The scenario envisioned by the US was as follows.

Achieve a ceasefire in Israel and remove the urgency of Israeli weapons deliveries.

The House of Representatives, Mike Johnson, will vote to reject the budget, which was approved by the Senate on a bipartisan basis. (Because the Israel aid budget is included, it is necessary to create a rearranged bill)

This leaves President Zelensky with no choice but to accept a ceasefire-like peace.

In a third country, they make Russia and Ukraine negotiate and accept a ceasefire-like peace agreement.

There would have been two options.

Zelensky's preferred plan is to establish a ceasefire in the three regions, including Crimea, and to make peace by stationing U.S. troops in Ukraine through a bilateral agreement with the United States.

The other option would be for Ukraine to join NATO by ceding a few regions to Russia. The policy is to expand the military of Ukraine and turn it into a military superpower.

What the US wants is probably Zelensky's first option. That is, like in Japan, controlling the country's high-ranking bureaucrats through the US military, thereby controlling politicians, and making Ukraine a vassal state of the US.

On April 5th (Japan time), Secretary of State Blinken headed to the NATO meeting via France and met with Ukrainian Foreign Minister Kuleba, where he mentioned Ukraine's intention to join NATO.

This means that the United States and Ukraine have reached an agreement on the second option. However, the US is also considering stationing US forces in Ukraine and making it a vassal state under a bilateral agreement between the US and Ukraine.

However, there are too big problem with this option. The question is whether economic sanctions against Russia will be lifted or not.

European countries never want to accept a ceasefire-like peace,

especially the lifting of economic sanctions against Russia.

In addition, in Russia, the mainstream, including Prime Minister Mishustin, and the Russian oligarchs believe that lifting economic sanctions is the most important theme, and peace without it has no meaning at all.

If sanctions against Russia were lifted, it would be a complete defeat for Ukraine and Zelensky's political career would be completely over.

It is safe to assume that Biden is thinking of abandoning Zelensky as Zelensky's term expires in May.

Although it appears on the surface that peace has been reached, Biden and Sullivan's aim is more toward a ceasefire and peace between Israel and Hamas. This is because the White House is more clearly responsible.

The US should be seen as deceiving Ukraine and Zelensky by merely making superficial advances.

- 4. That's because the movement changed significantly in the first week of April.**

This is because French President Macron has donated air defense missiles from France to Ukraine. Under Czech leadership, the supply of shells was also improved.

It also became clear that Crocus City Hall was an FSB false flag

operation. (British intelligence will have informed President Zelensky)

In a desperate bid to force a ceasefire-like peace on Ukraine, there were US moves:

- (1) Ambassador Julianne Smith, U.S. Permanent Representative to NATO, commented: "From the beginning, the US has told the NATO countries that Ukraine should not attack Russian mainland territory."**
- (2) Secretary of State Blinken visited France**

Secretary Blinken holds a joint press availability with French Foreign Minister Séjourné

Behind this is the demand that the Kremlin, the head of the Nazi FSB Bortnikov Hitler made to Biden and Sullivan.

Russia's arms factory and oil refinery facility in Tatarstan, a mainland territory located more than 1,200 km from Ukraine, were bombed by airstrikes by AI winged rush-type drones.

The Crocus City Hall bombing was later revealed to be a false flag operation by the FSB.

President Zelensky warned Russia in the strongest tone ever to the Washington Post, "If Russia continues to carry out air strikes on power generation facilities and civilian airstrikes in Ukraine, we will seriously attack Russian mainland territory."

The technology for all of Russia's oil refineries is provided by Western companies, and the companies have reportedly taken steps to prevent parts from being provided.

Therefore, it will be difficult for Russia's oil refineries to recover unless sanctions are lifted.

The Kremlin fears that Ukraine will follow up Plan X with Plan Z: making Moscow almost permanently uninhabitable.

UKRAINE

Plan X: Make Moscow uninhabitable until the end of the war.

Destroy the power line system near the nuclear power plant around Moscow with an AI image recognition rush-type drone to bring the reactor to an emergency stop. By repeating this process, the area remains uninhabitable during the harsh winter.

Plan Z: Make Moscow uninhabitable for many years.

In addition, destroy the auxiliary power supply of the reactor.

The US is likely trying to force a ceasefire-like peace on Ukraine, driven by Bortnikov.

Bortnikov is believed to have asked Biden to force a ceasefire-like peace on Ukraine, prioritizing an end to the Israel-Hamas war. Hamas is Russia's only trump card.

That's why they used NATO representatives and Blinken to appeal to Russia.

If a US representative to NATO says something in private to NATO military members, it can go unnoticed by the public.

However, when someone openly comments, it's a completely different story. This is because you have to think about who gave the speech, to whom, and what they were trying to convey.

Ambassador US Smith's speech does not leave a good impression on the NATO countries. This is because it conveys that "the US does not want Ukraine to win from the beginning."

This is unacceptable to the people of Ukraine and many other countries, and even to the citizens of the United States who are burdened with this burden.

Only the Kremlin, Russia, will be happy to hear that speech. Biden was simply trying to appeal to Russia by saying, "I'm working hard to force a ceasefire-like peace on Ukraine."

If this is a foolish statement made by a disoriented dementia patient, there is a possibility that things will change in the future.

<http://kay5.music.coocan.jp/What is the US next step after reducing the supply of shells.pdf>

However, it can be said that the US White House, including the National Security Adviser and the Chairman of the Joint Chiefs of Staff, could only make decisions similar to those of a patient suffering from dementia.

The security personnel in the White House and the US military are a group of incompetent people who will never improve.

The biggest problem is the choice to keep Bortnikov Hitler, head of the Nazi FSB, in the Kremlin. Since they are spies for the US President, it is nothing more than a conspiracy to continue their backroom dealings.

As long as Bortnikov remains in the Kremlin, the real Putin war, which he has defined as the fight to defeat the Nazis and Hitler, will never end.

Peace will never return to Ukraine as long as Bortnikov, who has repeatedly committed brutal torture and murder and committed large-scale terrorist acts such as the bombing of the Kakhovka Dam, remains in the Kremlin.

The people of Ukraine, the US, and Russia should send Biden, Sullivan, and Bortnikov to The Hague to be tried as war criminals.

The question is whether these dementia patients will continue to cause hundreds of thousands of deaths and injuries.

The United Nations General Assembly should abolish the Security Council and impose sanctions on Russia, the US White House, and the Department of Defense.

If this is not possible, the United Nations should be dissolved.

It is nothing more than an institution that can serve as an indulgence for those imperialist countries.

In Germany, France, and Japan, continent law countries might not be able to convict Biden and Bortnikov because there would be no evidence of their criminal acts.

However, Anglo-American law is common law, and especially in the US, guilt or innocence is determined by the jury's judgments.

Biden and Sullivan are likely to have sufficient evidence to support their war crimes.

Nothing has been disclosed about the meeting between Kremlin representatives, Biden, and Sullivan immediately after Prigozhin's Moscow march.

Biden and Sullivan, far from disproving this, are saying that they cannot refute it.

http://kay5.music.coocan.jp/Be_careful_with_Biden.pdf

If you ask Biden, he will probably just say, "I don't remember (because I have dementia)." But Sullivan isn't allowed the same.

http://kay5.music.coocan.jp/What_is_the_US_next_step_after_reducing_the_supply_of_shells.pdf

When the US first tried to impose a ceasefire-like peace on Ukraine, Chairman of the Joint Chiefs of Staff Milley commented, "Russian casualties exceeded 100,000, and Ukraine likely suffered about the same number."

He didn't even use the data the US had on how disastrous Russia's kill ratio was in Bakhmut's human-wave tactics. He ended up commenting on numerical predictions based on Russian documents.

It is same "I'm a Kremlin spy," the chairman of the US Joint Chiefs of Staff had said.

Neither Ukraine nor the rest of the world should continue to tolerate such stupid criminal acts by the US military and the White House.

On Apr. 3, 2024, facts related to the core of the US-Russia backroom deal have also emerged.

<https://www.pravda.com.ua/eng/news/2024/04/3/7449413/>

"Russian ship carrying nuclear fuel for US nuclear power plant detained in German port"

Economichna Pravda — Wednesday, 3 April 2024, 09:5632724

Why does Russia continue to supply nuclear fuel to the US despite being subject to so many economic sanctions?

It can be said that the Kremlin, which does not seek to sanction the US, continues to acknowledge the existence of backroom deals with the Biden administration.

The United States should become self-sufficient in nuclear fuel. Because there are many nuclear warheads. Moreover, the nuclear warhead cannot cause a nuclear explosion. This is because it does not have a structure that allows multiple enriched uranium pieces to be combined into one.

http://kay5.music.coocan.jp/You_should_impeach_biden.pdf

Only 13% of Russia's remaining nuclear warheads are filled with enriched uranium.

<https://t.me/generalsvr/1256>

http://kay5.music.coocan.jp/GeneralSVR_221204_87_of_Russian_nuclear_warheads_cannot_explode.pdf

As I was writing this document, Mike Johnson postponed the date for a vote on the Ukraine aid bill until mid-April.

<https://www.bloomberg.com/news/articles/2024-04-03/us-house-s-ukraine-war-aid-vote-is-likely-weeks-or-more-away?embedded-checkout=true>

This is probably because they believed that the April 9 vote would not be possible because the scenario of forcing a cease-fire peace on Ukraine was fading away.

If Israel does not reach a cease-fire and make peace, the aid bill will pass if it is voted on.

This is a completely meaningless reason, since Mike Johnson cannot create a consensus with the hardliners in the House of Representatives.

Not only must Biden, Sullivan, and Bortnikov be tried as war criminals, but we must also hold the real culprits, the US oil majors, US military, and military industry accountable.

Of the 1 trillion euros in reparations to Ukraine, half of the 500 billion euros would be borne by Russia, and half would be paid by the US oil majors, 250 billion euros, and by cutting military spending by 250 billion euros to pay reparations. We should start by considering the burden ratio at 1/2.

The military spending that will be cut should be returned to the American people, who have been paying high gasoline prices, in the form of tax cuts.

We need to hold Biden, Bortnikov, and the oil majors accountable. If the imperialist ways of the United States and Russia were to remain, conflicts and wars would soon return.

The United Nations General Assembly needs to have the power to implement international peace.

It can be said that both internet shutdowns and AI winged rush-type drones have proven to be forces of peace for imperialist countries that cannot be countered.

The United Nations General Assembly and its member states should confidently implement deterrence against imperialist powers that will achieve international peace and save the world from conflict and poverty.

We no longer need to wait for a single nuclear missile to be launched and to prove that it cannot produce a fission explosion. The tyrannical imperialism of the nuclear superpowers should be restrained immediately.

The Hiroshima-type atomic bomb (Fat) exploded, but the Nagasaki-type atomic bomb (Tall) could not even create a mushroom cloud.

The Nagasaki type was an unscientific weapon that, like today's nuclear warheads, was thought to be able to produce a nuclear explosion by igniting it with a gunpowder explosion.

However, when the atomic bomb was dropped on Nagasaki, the Urakami Cathedral of Christ Church burned down. The US, which attacks civilians, also attacks Christian churches, and is a mass murderer without any faith.

5. This document is a sequel to "The Crocus City Hall bombing was FSB false flag operation".
