You should impeach Biden!

1. Biden has backroom deals with the Kremlin.

Biden has allowed the war in Ukraine to continue, resulting in more than 2,000 casualties each day.

He should quit as soon as possible.

2. Nuclear missiles are nuclear garbage weapons that cannot cause a nuclear explosion.

$$E=mc^2$$

Nuclear weapons are intense light bombs in which the mass lost through nuclear fission transforms into the square of light.

- 1) Nuclear missiles do not have altimeters.
- 2) It does not have a structure in which only the internal partition walls are destroyed to unite the nuclear material. It does not reach criticality, does not emit strong radiation under high heat, and cannot undergo nuclear fission, in which neutrons are ejected and turned into light.

3) When an intercontinental ballistic missile lands at a height of around 1,000m above the ground, it exceeds Mach 10 and falls 1,000m in 0.3 to 0.15 seconds. Considering individual differences, it is nearly impossible to create an intercontinental ballistic missile that can detonate a nuclear weapon at a precise altitude.

4) If a tactical nuclear weapon is mounted on a cruise missile and lands in a built-up area, the light will be blocked by the buildings. Even if a nuclear explosion were to occur, it would have only a small effect and would be nothing more than a nuclear garbage weapon.

<http://kay5.music.coocan.jp/Warning to Russia, China and the US.pdf>

<http://kay5.music.coocan.jp/The three nuclear powers are desperate.pdf>

3. The US should also convert the radioactivity of its nuclear warheads into nuclear fuel.

1) Russia has been reprocessing nuclear warheads into nuclear fuel for use in nuclear power plants.

2) Only 13% of Russia's nuclear warheads remain. It is no longer possible to export fuel rods to the US.

3) Patrushev of the Russian Security Council proposed to Biden that we should stop threatening nuclear weapons, conducting exercises that lead to military expansion, and putting the world in a state of tension. Nevertheless, Biden opposed it. Looks like Biden had Bortnikov assassinate Patrushev.

4) The US should end military expansion that impoverishes the world and US taxpayers, and diverts radioactivity from nuclear warheads into nuclear fuel rods for the energy transition.

4. You must act for the people of the United States and for the people of the world.

1) Reject the Ukraine and Israel aid budget bill in both the Senate and the House of Representatives.

2) Pass an annual budget with a significant reduction in defense spending. There is no need to budget for new weapons and ammunition. There would be no problem if old

weapons and shells were given to Ukraine and Israel.

- 3) Pass a bill to abolish nuclear weapons and convert nuclear warheads to nuclear fuel rods.

5. Disarmament is essential in preparation for recession

- 1) China's economy will contract and US stock prices will also fall. The US economy will be greatly affected.
- 2) In another 100 years, oil will become extremely expensive. It is practically depleted. Energy transition is essential.
- 3) Since military expenses are covered by taxes, they do not create any added value. It only creates poverty in the world. Disarmament is essential.

6. If Biden resigns, sooner or later Russia will stop the war.

- 1) There is a possibility that the Internet will be shut down based on the UN General Assembly resolution, not only against Russia but also against the US White House.
- 2) Ukraine has AI winged drones capable of ultra-precision attacks that could “make Moscow almost permanently inhospitable.” Therefore, even if Russia uses nuclear missiles, Ukraine will not lose.

- 3) Putin has already died in May 2023, and it is certain that the Russian Federation will collapse in 2024. However, as long as Biden is president, the Kremlin will continue to hold out hope for a ceasefire-like peace, and it is highly unlikely that the war of aggression will end.
- 4) You should start a new era for the US and the world.
- 5) You must not allow the backroom politics of Biden and Trump, who have sown conflict around the world through backroom deals with the Kremlin, to continue.

Putin has already passed away

on May 29, 2023.

It was caused by a subarachnoid hemorrhage

on May 12, 2023.

Security Council Secretary Nikolai Patrushev

offered President Biden a heartfelt proposal

to address the upcoming US energy crisis:

"Russia now has only 13% of its nuclear warheads
remaining.

The nuclear fuel used by the US

should be made and supplied from nuclear warheads that the US owns."

President Biden did not accept this, and Patrushev was assassinated. This was the day after Patrushev ruled that Putin could no longer continue as president.

Russia may have started a war of aggression against Ukraine to take control of Ukraine's uranium mines. This may be the reason why President Biden has tried to impose a ceasefire-like peace on Ukraine as many as 9 times.

Trump did not create an opportunity to take over the presidency because he did not want to inform Biden of his backroom dealings with the Kremlin.

Biden learned that from Patrushev.

Biden then had Trump's home searched and obtained classified documents that are only passed down to the president.

Some were kept by Biden at his home.
Probably to prevent anyone from seeing it
at the White House.

The existence of backroom deals
between the US president and the Kremlin
is the real reason
why Russia's war of aggression in Ukraine
has not ended yet.

It is for the same reason
that the US and Russia have been trying
to cover up Putin's death.

I would like you to carefully read
not only the document I sent,
but also the documents linked from there.

Each member of the US Congress
must fulfill your responsibilities.

For the American people and the people of the world,
we must solve our energy problems,
end wars and conflicts,
respond to the economic recession that will arrive in 2024,
implement disarmament,
and reduce our tax burden.
